August 2025 Changelog

For help upgrading to the latest version, contact your Cloudhouse Representative. The following table describes each component available to upgrade within this release of Cloudhouse Guardian (**Guardian**).

> 💡 **Tip:** For more information on the known issues currently present within Guardian, see **Known Issues**.

Last Updated	Release Date	Guardian Platform	Guardian Web	Linux Agent	Windows Agent
29th August 2025	27th August 2025	V4	V3.58.3	V5.46.0	V5.22.0

Guardian Web Application V3.58.3

Here's what's included in V3.58.3 of the Guardian web application as part of the August 2025 monthly release.

New Features

- `New` **Import/Export Scan Options**: Added two new buttons to the **Scan** options drop-down list, displayed when editing a node group's settings (**Import Scan Options**/**Export Scan Options**).

  > 📝 **Note:** Now available in both default Monitored and new Monitored skins.

Enhancements

- **Global Enablement of Pluggables**: Pluggables now behave consistently across all organizations.
  - New centralized setting: **Enable Pluggables** checkbox in **General Settings**.
  - Feature flag removed from internal **Features** page.
  - Backward compatibility maintained.
  - Simplified UI: **Default** section removed from **Pluggables** tab.

- **Security Update**: CIS benchmark checks refreshed. Automatically applied; no user action required.

- **Support for Larger Scan Results**: Increased parameter and bytesize limits for Rack query parser.

- **Scan Docker/Kubernetes Containers**: Add/Edit Node pages updated to support scanning Linux-based Docker containers and Kubernetes pods/deployments.

> **Note:** Requires latest Connection Manager and remote helper. Contact Cloudhouse Representative to enable.

Fixed Issues

- `New` **GWB-6270 – Azure AD Node Sync**: Fixed an issue where nodes detected during Azure AD integrations were not being added to the Detected or Monitored tabs.

- `New` **GWB-6273 – Preprocessor Settings Visibility**: The Preprocessor section is now visible and editable directly from the Node Group Settings page.

- **GWB-6236 – Incorrect Option Displayed for Connection Manager Groups**: **Remove Nodes From Group** option removed when viewing Connection Manager groups. Improves clarity and prevents confusion.

Linux Agent V5.46.0

Here's what's included in V5.46.0 of the Linux Agent as part of the August 2025 monthly release.

New Features

No new features in this release.

Enhancements

- **Scan Docker/Kubernetes Containers**: Scanning now supported within Linux nodes.

> **Note:** For more information, see the full release notes for the **Guardian Web Application V3.58.2**.

Fixed Issues

- **GLA-899**: Cisco Node Connectivity Checks. Connectivity checks now correctly validate IP reachability and credentials.

Windows Agent V5.22.0

New Features

No new features in this release.

Enhancements

None in this release.

Fixed Issues

- **GWA-488** – Install Log Not Launching. Timing issue fixed; install log now opens correctly when selected.
