July 2025 Changelog

For help upgrading to the latest version, contact your Cloudhouse Representative. The following table describes each component available to upgrade within this release of Cloudhouse Guardian (**Guardian**).

> 💡 **Tip:** For more information on the known issues currently present within Guardian, see **Known Issues**.

Release Date	Guardian Platform	Guardian Web	Linux Agent	Windows Agent
23rd July 2025	V4	V3.57.0	V5.45.1	V5.21.1

Guardian Web Application V3.57.0

Here's what's included in V3.57.0 of the Guardian web application as part of the July 2025 quarterly release.

New Features

- **Search Enhancements**: You can now search within **Environments** and **Connection Manager Groups** on the **Monitored** tab, in addition to **Node Groups**.

Enhancements

- **Data Retention**: Automatic cleanup of historical data has been introduced to help manage disk space. Custom retention rules available on request.

Fixes

- **GWB-6219**: **Secondary Password** field now correctly appears when adding 'Cisco' or 'Pluggable' nodes.
- **GWB-6232**: Custom policies now display correctly when adding them to node groups with no existing policies.

Linux Agent V5.45.1

Here's what's included in V5.45.1 of the Linux Agent as part of the July 2025 quarterly release.

Enhancements

- **Backend Stability**: Improved error handling and Goroutine synchronization for more reliable operation.

- **F5 Error Reporting**: Added support for file-based testing and clearer error messages by isolating the relevant config section.

Fixes

No issues fixed in this release.

Windows Agent V5.21.1

Here's what's included in V5.21.1 of the Windows Agent as part of the July 2025 quarterly release.

Enhancements

- **Unattended Install Support**: New `--additional_config_values` argument allows passing custom key-value pairs during installation.

Fixes

No issues fixed in this release.
