

September 2025 Changelog

For help upgrading to the latest version, contact your Cloudhouse Representative. The following table describes each component available to upgrade within this release of Cloudhouse Guardian (**Guardian**).

Tip: For more information on the known issues currently present within Guardian, see [Known Issues](#).

Release Date	Guardian Platform	Guardian Web	Linux Agent	Windows Agent
25th September 2025	V4	V3.59.2	V5.47.0	V5.23.0

Guardian Web Application V3.59.2

Here's what's included in V3.59.2 of the Guardian web application as part of the September 2025 monthly release.

New Features

- **Manual Change Reconciliation** – The **Change Report** tab now supports manual approval of configuration changes, with filtering, commenting, and export options. This is an optional feature. Contact Cloudhouse Representative to enable.

Other Enhancements

- **Filter Changes** – To exclude specific changes in the change report, prefix filter terms with a minus sign (e.g., '.log' removes .log-related changes).
- **Export Only Displays Changed Attributes** – Exported change reports now only show modified attributes, making PDF and CSV files vbclearer and easier to review.

Fixed Issues

- **GWB-6275 – Italic Text in Custom Scripts Drop-Down with Monitored Skin** – Custom scripts text formatting in drop-down menu now fixed. It now displays correctly regardless of whether the new **Monitored** skin is enabled.

Tip: To enable the new **Monitored** skin, contact your Cloudhouse Representative.

- **GWB-6315 – Scheduled Change Report Failure After Upgrade** – Deprecated **Change Report** job failed after upgrade due to a missing variable. The job now runs correctly, but users are encouraged to switch to the newer **Scheduled Change Report** for better support and granularity.
- **GWB-6292 – Inconsistent Rule Name Formatting Between API and CSV Export** – Rule names in CSV exports now include rule numbers, matching the API format for consistent integration with external systems.

Linux Agent V5.47.0

Here's what's included in V5.47.0 of the Linux Agent as part of the September 2025 monthly release.

New Features

No new features in this release.

Other Enhancements

- **Optimized AWS Node Detection in Connection Manager** – AWS node detection in Connection Manager and Agent is now batched for faster scans and reduced throttling, improving performance and log efficiency.

Fixed Issues

None in this release.

Windows Agent V5.21.2

Here's what's included in V5.23.0 of the Windows Agent as part of the September 2025 monthly release.

New Features

No new features in this release.

Other Enhancements

None in this release.

Fixed Issues

None in this release.

Note: The Windows Agent component is being released separately on 6th October 2025.
