

October 2025 Changelog

For help upgrading to the latest version, contact your Cloudhouse Representative. The following table describes each component available to upgrade within this release of Cloudhouse Guardian (**Guardian**).

Tip: For more information on the known issues currently present within Guardian, see [Known Issues](#).

| Last Updated | Release Date | Guardian Platform | Guardian Web | Linux Agent |
|-------------------|-------------------|-------------------|--------------|-------------|
| 3rd November 2025 | 29th October 2025 | V4 | V3.60.1 | V5.48.0 |

Guardian Web Application V3.60.1

Here's what's included in V3.60.1 of the Guardian web application as part of the October 2025 quarterly release.

New Features

- **Improved Credentials Handling for Synchronize Nodes Job**
 - Use stored credentials from Vault or Secret Server for Freshservice and integrations.
 - Eliminates manual entry of Windows/Linux credentials.
- **Search by External ID**
 - Search across Node Groups, Environments, and Connection Manager Groups.
- **New Event for Unsuccessful First Node Scan**
 - Event now triggers on failed first scans for new nodes.
 - Supports automated incident reporting and remediation.

Other Enhancements

- **Banner Display Time Reduced**
 - Banners now show for 1.5 seconds (previously 7 seconds).
- **Change Report Improvements**
 - **PDF Export:** Includes all records.
 - **Faster Loading and Filter Response.**
 - **Ignore Changes Option:** Hide selected changes from reports.
 - **Sort by Key Fields:** Path, Created Date, Node Name, Change Type.
 - **View All Elements for Modified Nodes:** Full node state shown.
 - **View Entire Change History:** Includes file diff for `.txt` files.
- **Role-Based Visibility for Change Reconciliation**
 - Admin-only for approval actions.
 - Analysts/Members can view but not approve changes.

Fixed Issues

- **GWB-6381:** Jira Combine feature updated to new API endpoint.
- **GWB-6351:** Priority field logic corrected in Scan Directories.
- **GWB-4424:** Email address change error handling fixed.
- **GWB-6252:** Consistent application of scan options restored.
- **GWB-6328:** Prevent duplicate approval reasons.
- **GWB-6362:** Filter clear button layout fixed.
- **GWB-6317:** Default Scan-Type applied to all entries.
- **GWB-6310:** Removed incorrect LDAP restart notification.
- **GWB-5235:** Special characters allowed in dynamic node group queries.

- **GWB-6280:** ESXi Benchmark variable handling improved.
- **GWB-6281:** Correct variable count display in ESXi Benchmark.
- **GWB-6313:** Duplicate approvals no longer skew counts.

Linux Agent V5.48.0

Here's what's included in V of the Linux Agent as part of the October 2025 quarterly release.

New Features

There are no new features included in this release.

Enhancements

There are no enhancements included in this release.

Fixed Issues

- **GLA-911:** RPM package parsing updated for non-standard formats.
- **GWB-908:** F5 parser supports `tcl` token.
